

**AP Biology**  
**Summer 2009 Reading**

Campbell's Biology (AP Edition, 8th edition), chapters 50-55 on Ecology.

Students will read, take notes, and do the review questions on these chapters over the summer to allow for more time during the year for chapters 1-49.

If you're registered for the class, pick up the text at school after July 20th.

You may purchase this text on your own, but **please let us know beforehand** so that we do not purchase more than we need (a rather pricey text)!
